INSULATED BOTTLES AND TUMBLERS

BY  bottleworx

TECHNOLOGY AND TOP QUALITY MATERIALS IN BOTTLEWORX PRODUCTS

All products are double-walled stainless steel, copper-coated, and vacuum-sealed to provide the best hot or cold duration that current tech can provide. The bottles are made from the highest available food-grade stainless steel while the outside are either coated with non-toxic and scratch resistant powder-coating finish or premium clear coating. The lids are made with medical grade polypropylene, which are 100% BPA free and very safe to drink from, and premium food grade silicone for the straws and gaskets.
